b. CUSTOM CALLING SERVICE DESCRIPTIONS

1. Call Waiting - By means of a tone signal a customer who is using his telephone is alerted when another caller is trying to reach that station. This permits putting the first call on hold so that a second call can be answered. This may be canceled on a per call basis by the customer by using a two (2) digit code.
2. Call Forwarding - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which he wants all incoming calls to be automatically transferred. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred.
3. Three Way Calling - Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.
4. Speed Calling - Enables a customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. Customer may subscribe to only one of either the 8 Code capacity or 30 Code capacity on the same line.

Terms and Conditions

5. Custom Calling Services will be provided in connection with individual line residence and business service.
6. Call Intercept - Enables a customer to block incoming calls for a specified period of time. The calling party will receive a recorded message. The customer can still make outgoing calls while this is activated.
7. Automatic Redial - This is a CLASS feature and outgoing call management feature which will enable a customer to dial a special code to redial the last number dialed from their station. This will apply regardless of whether the original call was answered, or encountered a busy tone. The system will monitor the calling and called lines and will attempt to connect the call for up to 30 minutes. The activation of this feature can be canceled by a customer when desired.
8. Hot Line - This is a CLASS service that allows a customer to establish a switched connection to a predetermined number when the customer's telephone goes off-hook. No dialing is required and the call is processed automatically to the predetermined telephone number.
9. Caller ID (Number Only) - This is a CLASS service that allows for the automatic delivery of a calling party's telephone number (including non-published and non-listed telephone numbers) to the called customers, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The number is displayed on customer provided equipment.
10. Caller ID (Number & Name) - This is a CLASS service that allows (where technically feasible) for the automatic delivery of a calling party's name and number to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The number and name are displayed on customer provided equipment.

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified in writing of such errors.

11. Caller ID Blocking - Per Call - This is a CLASS service that enables a customer to control the disclosure of their telephone number or name and telephone number to a customer of Calling Number Delivery and/or Calling Number with Calling Name Delivery (where technically feasible) by temporarily changing the public/private status indicator of the telephone number. A Customer must dial a code before each call to change the indicator from public to private. "Public status" allows delivery of the telephone number or name and telephone number. "Private status" prevents delivery of the telephone number or name and telephone number.

Terms and Conditions

12. Caller ID Blocking - Per Line - This is a CLASS service that provides a permanent private indicator on a customer's line. Once blocking is established on the customer's line, the private status can be deactivated by the customer on a per call basis. Federal, State, and Local Law Enforcement Agencies, nonprofit domestic violence/sexual assault agencies and their staffs, and victims of domestic/sexual assault or individuals who express a personal safety need and sign a personal safety exemption form may be provided additional arrangements for private status and/or line blocking, on a line-by-line basis, at no charge.

The certification form identifies a customer who is to receive Per Line Blocking at no charge and acknowledges that if a line is equipped with Per Line Blocking, that the telephone number and name will not be delivered to customers of Calling Number Delivery and/or Calling Number with Calling Name Delivery, including poison control centers, hospitals, medical centers and others who might use Calling Number Delivery and/or Calling Number with Calling Name Delivery to provide assistance. 911 is not affected. Some customers of Calling Number Delivery and/or Calling Number with Calling Name Delivery Service may choose not to answer blocked calls.

The customer acknowledges the understanding of the above. Further, the customer releases the Company from all claims and liability, including personal injury caused by its errors, omissions and operation or malfunction of Per Line Blocking service.

13. Automatic Callback - This is a CLASS service that enables a customer to have call set-up performed automatically to the calling party of the last incoming call. This applies whether the incoming call was answered or unanswered. If the directory number of the last incoming call is not marked "private", a customer hears a voice announcement of the directory number, and is given the opportunity to re-call that number. If the directory number of the last incoming call is marked "private", it will not be voiced back.
14. Call Trace - This is a CLASS service that allows a customer to initiate a trace on the last incoming call by dialing an activation code. The call is traced automatically, and the originating directory number and the time the call was made are forwarded to a designated printer.
15. Selective Call Acceptance - This is a CLASS service that allows a customer to define a list of calling directory numbers that will be accepted. Calling parties not on the acceptance list receive an announcement stating that the call is not presently being accepted by the called party. (Customers do not receive notification that calls were rejected.)
16. Blocked Call Rejection: Allows a customer of Caller Identification - Name and/or Caller Identification - Number to reject calls for which calling name/number display information has been intentionally blocked. Only calls for which the information has been blocked are rejected.

Terms and Conditions

16. B. FRANCHISING AUTHORITY

1. The franchising authority is either the local municipal or state government organization that issues the franchise pursuant to Iowa Code section 364.2. The authority regulates certain aspects of the cable television industry, mainly access to public rights of way.
2. Franchise fees are sometimes charged by the local municipal franchising authority to a cable service provider for the access to public rights of way.
3. The franchising authority also has limited jurisdiction over customer service, including complaints, signal quality and service requests.

C. CABLE SERVICE PROVIDER AUTHORITY

1. With the exception of some rules that require service providers to carry certain local broadcast stations, all service providers decide which programming services to carry.
2. All rates for basic, enhanced basic, pay-per-view, video-on-demand, premium, equipment, installation and other service type charges are set by the service provider and are not regulated.

D. TYPES OF SERVICES

1. Basic or Lifeline - This refers to the lowest level of cable service offered and generally includes local broadcast channels and public, educational and governmental access channels. Your service provider may not require you to purchase any additional service tier other than the basic service in order to have access to pay-per-view or premium channels offered on an individual basis.
2. Enhanced Basic – second level of service and generally includes the basic service channels plus a variety of additional channels crossing multiple genres of content.
3. Ultimate Basic – third level of service and generally includes enhanced basic channels plus additional sports and personal interest channels.
4. Premium Channels – channels purchased ala carte monthly such as HBO, Cinemax, Showtime, etc.

5. Pay-Per-View – movies and events purchased ala carte and viewed according to the guide schedule.
6. Video-On-Demand – movies and events purchased ala carte at any time.
7. Standard Definition channels are 720 x 480 pixels
8. High Definition Channels offer enhanced pictures that are 1280 x 720 pixels.
9. Availability of content is governed by content provider and certain channels and types of services may not be available in Public or Business location.

F. PRICE LIST/RATE CARD

Rates for Cable TV Services are listed in Part 5.

G. TYPES OF CHARGES (FEES) ON YOUR BILL

1. Franchise - local municipal monthly charges for use of public right of way.
2. Retransmission – local broadcast station monthly charges for redistribution of their content.
3. Programming – all other channels monthly charges for distribution of their content.
4. Equipment Rental – service provider monthly charges for renting set top boxes, DVR, etc.
5. Taxes – all federal, state and local taxes as required by law.

H. WHERE TO ASK QUESTIONS OR FILE COMPLAINTS

1. Contact the service provider for questions about customer service, billing, installations, outages, service requests and signal quality.
2. Contact the local franchising authority if the service provider has not resolved your issue and you have complaints about customer service, pricing, installations, outages, service requests and signal quality.
3. Contact the FCC at 1-888-225-5322 or send your inquiry to FCC, 445 12th Street, S.W., Washington, D.C. 20554 if you have questions or complaints about commercial limits for children's programming, indecency and obscenity, premise wiring and signal leakage.
4. Note: Cable systems with 1,000 or more subscribers are required to maintain certain documents in a public inspection file. These documents include a political programming file; sponsorship identification; EEO reports; commercial records for children's programming; leased access requirements; proof-of-performance tests; and signal leakage and repair logs. These are available for public inspection and copying. In addition, systems must have a current copy of Part 76 of the Commission's rules, which cover cable television.

I. OTHER OPTIONS FOR TELEVISION PROGRAMMING

1. Over the Air - Since 2009, all full-power TV broadcast stations can only be received in digital format. To watch a television station over the air without a pay TV subscription, you need either a digital TV or an analog TV connected to a digital-to-analog converter box. In either case, you will need an appropriate antenna connected to the TV or the converter box. Depending on your location, this could be either an outdoor or an indoor antenna and you may or may not receive a signal.
2. For more information on antennas, see the Antennas and DTV consumer guide.
3. Online - Some programming can be accessed with a Broadband connection though availability is often delayed.
